##Writing an introduction to an informative blog post titled "Chocolate Croissant Recipe". Articles The Chocolate Croissant is a recipe that I created for my wife's birthday. It's very easy to create and takes less than 10 minutes to put together, so it's great if you want something sweet and delicious for your partner, which you can make ahead and keep in the freezer or refrigerator. I'll be working on a video tutorial on how to make the Croissant in the near future.

  Copy the .component file to the default location. Launch OverloudTH3.app, select Open or Import and select Component. The component will show up in the list of available components. Press "Load" to load the component into the current host (Ableton Live in this case). Now you can start using it right away! You can change presets inside OverloudTH3 without erasing any of your current presets. OverloudTH3 can be used in standalone mode, enabling you to run it without using any other application (even Ableton Live). This is useful if you wish to load multiple sound libraries into one instance of OverloudTH3. The standalone version is also installed with the default presets, so once loaded, it can be used straight away. If you don't like the preset folders, the standard locations for presets are: Ableton Live 9 format preset locations

There is an alternative application named OverloudTH3 Lite which can be downloaded here . It has many bug fixes and many more features than the full version of OverloudTH3. Overloud PDF Manual -Homepage -Downloads -Downloads FAQ -Facebook Page -Twitter Page

When Overloud released the first version of Overloud TH3, it included a multitude of presets (called "modules") for all common plugins (such as compressors, EQs, reverbs...). After the release of version 3.0, Overloud decided to make all modules free for registered users. These modules are now available at https://www.overloud.com/downloads/module-packs/. The module packs are categorized into different genres and styles that you can use to quickly find one that would help you with your current project or application.
